PCI DSS Compliance Program

Simplify compliance, enhance security, and gain peace of mind with SecurityMetrics'
PCI compliance program.

Streamlined Dashboard
Simplify compliance tasks, access certificates, and get support easily, reducing stress and allowing you to focus on your business.

Guided Self-Assessment Questionnaire
Save time and ensure accurate completion with Fastpass, which selects the appropriate SAQ and provides step-by-step guidance.

Breach Protection
Gain peace of mind with up to $100,000 in data breach coverage worldwide, ensuring financial protection for compliant merchants.

Quarterly Vulnerability Scans
Easily set up and view detailed scans, ensuring continuous security monitoring and compliance for online credit card processing.

Online Security Awareness Tools
Stay informed and prepared with access to training materials, enhancing understanding and promoting proactive security measures.

How it Works

1 Prior to enrollment, you will receive a notice for the SecurityMetrics PCI Compliance Program.

2 Upon enrollment, SecurityMetrics initiates onboarding.

3 Look for a welcome email from SecurityMetrics containing login credentials to access your portal and dashboard.

4 Gather the following information for PCI compliance requirements:
- Merchant ID (MID)
- IP address
- Third-Party Integrations
- Point of Sale (POS) Device details: Vendor, Brand, Model Number

5 Log in to the portal and proceed with the following :
- Complete the Self-Assessment Questionnaire (SAQ).
- Set up quarterly network scans.
- To determine the appropriate SAQ, click on the "Get Started With PCI 3.2.1" link under your To-Dos. You will be redirected to the SecurityMetrics FastPass scoping tool.

6 Upon fulfilling the requirements, access your compliance certificate and updates in your portal.

Renew SAQ yearly. Network scans run every 90 days.
